

Start bundle in Docker

`./easy2use start -t Docker <bundle>`

Install/Remove

Start bundle in K8S

`./easy2use start -t Kubernetes -n <namespace> -d <domain> <bundle>`

Start bundle's service(s) in K8S

`./easy2use start -t Kubernetes -n <namespace> -d <domain> -s <service1,service2..> <bundle>`

Start bundle's package in K8S

`./easy2use start -t Kubernetes -n <namespace> -d <domain> -p <package> <bundle>`

Remove bundle in Docker

`./easy2use remove -t Docker <bundle>`

Remove bundle in K8S

`./easy2use remove -t Kubernetes -n <namespace> <bundle>`

Remove bundle's service(s) in K8S

`./easy2use remove -t Kubernetes -n <namespace> -s <service1,service2..> <bundle>`

Remove bundle's package in K8S

`./easy2use remove -t Kubernetes -n <namespace> -p <package> <bundle>`

Local K8S hyper-v configuration

`./easy2use configure-local-k8s-hyper-v -t Kubernetes -n <namespace> <bundle>`

Local K8S cluster

Local K8S minikube configuration

`./easy2use configure-local-k8s-minikube -t Kubernetes -n <namespace> <bundle>`

Local K8S hyper-v hosts file config

`./easy2use generate-local-hosts-file-hyper-v -t Kubernetes -n <namespace> <bundle>`

Local K8S minikube hosts file config

`./easy2use generate-local-hosts-file-minikube -t Kubernetes -n <namespace> <bundle>`

List URLs for services in K8S

`./easy2use list -t Kubernetes -n <namespace> <bundle>`

Listings

List URLs for services in Docker

`./easy2use list -t Docker <bundle>`

List packages in bundle for Docker

`./easy2use list-packages -t Docker <bundle>`

List packages in bundle for K8S

`./easy2use list-packages -t Kubernetes <bundle>`

List services in package for K8S

`./easy2use list-packages -p <package> -t Kubernetes <bundle>`

List user/psw for services in K8S

`./easy2use list-psw <bundle>`

List bundle information

`./easy2use info <bundle>`

# EASY2USE

## Cheatsheet

Usage: `./easy2use COMMAND [OPTIONS] BUNDLE`

Help: `./easy2use -h`

GitHub: <https://github.com/eiffel-community/eiffel-easy2use>
